

Welcome to:

Unite

A System Manual

Authors:

Harrison Beerley

Miyo Imai

Erica Chen

Andrew Shoffler

Requirements:

- The following browsers have been tested and work with `unite-site.herokuapp.com`:
 - Firefox 38.0.5
 - Opera 60
 - Chrome 74
 - Edge 44
 - Safari
- Additional requirements if you wish to run site on your local machine:
 - Windows 10
 - Python 3.4+

Starting the System:

- If you wish to run a local version of our site on your own system or if you would like to host your own version of our site, follow these instructions:
 - Clone the repository found at github.com/hrsnb/unite to your local machine.
 - In the master branch, run `'pip install -r requirements.txt'` to install all dependencies.
 - Run `'python manage.py makemigrations'`.
 - Run `'python manage.py migrate'`.
 - Run `'python manage.py createcachetable spirit_rl_cache'`.
 - Run `'python manage.py runserver'` to host a local version of the website using a db3 lite database (Postgres is used in production).
 - Access the site by typing `localhost:8000` into your supported browser of choice.

Troubleshooting:

- Common errors and their solutions:
 - When you reload a page exclusive to a logged in user, then you log out and refresh the page, an error will be thrown.
 - Solve this by simply going back to the home page of the site and logging in again.
 - When you try uploading a photo, all that appears in the post is a small icon and the name of the photo.
 - Please refer to <https://unite-site.herokuapp.com/topic/16/posting-pictures-please-read/#c2>, where the issue is discussed thoroughly

Contacting Developers:

- If any unexpected issues should arise, feel free to contact any of the following:
 - Miyo Imai | mei28@drexel.edu | Developer
 - Harrison Beerley | hjb48@drexel.edu | Product Owner/Developer
 - Erica Chen | ec875@drexel.edu | Scrum Master/Marketing Expert
 - Andrew Shoffler | aps332@drexel.edu | Developer
